EXECUTIVE SUMMARY

Section 20(1) of the Kenya Information and Communications Act, 1998 (as amended), requires the Authority's Board to prepare a report of its operations within three months of the send of each Financial Year. In compliance with this statutory obligation, the Authority prepared this report based on the activities and initiatives for implementation under year five of the Strategic Plan 2013-18.

During the year, there was significant growth in the ICT sector as a result of the Authority's continued provision of an enabling environment for service providers. The sector grew from 97, per cent in 2016 to 11.0 percent in 2017. This was witnessed by the uptake of mobile telephone services whose subscriptions increased from 40.3 million to 45.6 million. The broadband services increased from 40.3 million to the previous reporting period. Additionally, the number of mobile money subscriptions stood at 297 million with 26.022 active mobile money. transfer agents. As a result, the number of Kenyans accessing mobile communication services, mobile money services, e-commerce, high-speed Internet/Broadband service, and other ICT services has continued to grow.

During the year, the Authority implemented several activities that focused on fostering development in the ICT sector and empowement and protection of consumers of ICT services with respect to prices charged, quality and diversity of those services. These activities included: Issuance of 4G license and assignment of additional frequency in the 800MHz band to an additional MNO and extension of 4G trial Increase in the 700 MHz band. Issuance of 260 Telecom licenses and 216 postal and courier licenses.

- Monitoring and review of traffis & promotions and interconnection agreements improvement of management of cyber space through deployment of enhanced detection system for the National Kis-CRY/CC.
  Stateholder engagements and consultations via County ICT Consumer Fora dubbed 'Kikao Navadis' exhibitions and promotional activities.

  Active participation and representation in regional and international ICT sector policy forums.

In an effort to enhance service delivery, the Authority embarked on the implementation of an Enterprise Resource Planning (ERP) system to autemate some of its processes. It also installed video-conference and tele-conference facilities at its headquarters and regional offices to facilitate online meetings.

A detailed explanation of all these accomplishments and more for the FY 2017/18 is highlighted in this Annual Report.

MR. NGENE B. GITUKU
Chairman, CA Board of Directors

## CHAIRMAN'S STATEMENT

On behalf of the Board of Directors, I am pleased to present this Annual Report for the Financial Year 2017/2018, which highlights the Authority's achievements and strides taken towards the fulfilment of its mission to facilitate the transformation of lives through progressive regulation of the ICT sector.

These achievements are based on activities and initiatives for implementation under year five of the 4th Snategic Plan 2013-18, that had four pillars: finabiling Environment; Market Development; Instatructure and Service Development; and Institutional Capacity. The 4th Snategic Plan, which came to a conclusion on 30th June 2018, has been critical in steering the Authority towards the fulliment of its mandate and the country's Vision 2030. I am pleased to report that its implementation contributed immensely towards the country's GDP with the ICT sector recording a growth of 11.0 percent in 2017 compared to 97 per cent recorded in 2016. This has commendably propelled the country to be recognised as a budding ICT hub in the region. The Authority has since developed a Strategic Plan for the period 2018-2023 that will provide the basis for planning and allocation of resources to achieve our mandate going forward.

As outlined in this report, the Authority continued to work harmoniously with stakeholders and nurtured collaborative frameworks and strategic partnesships, to develop an enabling regulatory environment that meets the needs of the ICTI ndustry. Notably, during this period, the Authority played a critical role in the development of the Computer Misuse and Cyber Crimes Bill that was enacted to Law as the Computer Misuse and Cyber Crimes Bill that was enacted to Law as the Computer Misuse and Cyber Crimes Act, No.5 of 2018 thus institutionalizing the management of cyber security, During the year, the Authority penhanced its cyber security management capabilities, thus reducing the prevalence of cybercrime in the country.

The Authority has an obligation to ensure that people in all parts of the country get the best possible mobile telephone services. In pursuit of this obligation, the Authority, through the Universal Service Fund, provided core infrastructure for basic voice mobile services in 30 sub-locations considered not to be economically viable by Mobile Network Operators.

We have a sharp focus on improving broadband, phone and mobile services for consumers as the country embraces modern technologies such as the 4G. During the year, the Authority issued an additional 4G frequency license in the 800MHz band and extended the 4G trial licenses in the 700 MHz and 800 MHz bands. This led to increased deployment of 4G base stations thus impacting positively on the quality of communication services offered in the country.

In an effor, to bring services closer to the people and enhance enforcement activities, the Authority established two additional regional offices in Nyanza and Central Regions bringing the total number of regional offices to four.

the entire public for the trust shown to us since inception and the invaluable support to the Authority as it strives to ensure a digitally transformed nation amount so that properly and beyond. I further wish to acknowledge the dedicated service and commitment of the Board, Management and the Staff of the Authority in the attainment of these In conclusion, I would like to express the Board's sincere gratitude to the entire Government of Kenya, the Ministry of ICT, industry operators, industry stakeholders and

Ngene B. Gituku Chairman of the Board

Your World | PAGE 23

### MESSAGE FROM THE DIRECTOR GENERAL

million recorded in the previous year. In the mobile financial services market, the number of active mobile money transfer agents increased to 266,022, facilitating transactions worth KES. 7.2 trillion in value. Kenya's ICT sector continued to register improved performance, which has contributed significantly to the country's CDP growth. This accelerated growth has to a large extra been attributed to the flourishing digital economy, through mobile communication services, mobile money services, e-commerce, and the continued uptake of high-speed internet services. The number of mobile subscriber's stood at 45.6 million, up from 40.3.

Frequency spectrum remains a critical enabler of our country's digital communications development. During the year under review, the Authority issued an additional frequency license in the 800MHz band. In addition, the Authority extended the 40 trial licenses in the 700 MHz and 800 MHz bands. This allocation of additional spectrum resources led to increased deployment of 40 base stations and hence impacting positively on the quality of communication services offered in the country.

In order to mitigate the negative effects of cyber crime activities in Kenya, the Authority continued to discharge its responsibilities as the Country's trusted point of contact for coordinating responses to cyber attacks and remediation of cyber security.

and Education Broadband Connectivity projects under the Universal Service Fund (USF). These projects were aimed at extending services to the un-served and under-served areas of the Country. The Authority embarked on the implementation of the Voice Infrastructure and Services

In order to enhance capacity, modernize systems and improve internal processes, the Authority began implementation of the first project of the Business, Project Re-engineering and Automation (BPRA) programme. This project comprises of implementation of an Enterprise Resource Planning (ERP) System to automate human capital and administration, procurement and finance and accounts functions respectively.

In furtherance of its consumer protection mandate, the Authority continued to educate ICT consumers. This was achieved through County ICT Consumer Forums, dubbed Kikao Kikuu which provided a platform for consumers to directly interact with the Authority and service providers.

The aforementioned achievements would not have been realized without the support the Authority's dedicated staff. I also wish to exposs my sincere thanks to the Authority's Board of Directors and the Mnistry of Information, Communications and Technology for their continued support.

Lastly as we embark on the implementation of the Strategic Plan 2018-2023 I wish to call on the industry to join us in serving our citizens, while ensuring that Kenya continues to remain at the helm of ICT innovation in Africa.

Francis W. Wangusi, MBS Director-General

# **RISK MANAGEMENT AND INTERNAL CONTROLS**

### Risk Management

quarterly reports on the status of risk exposures. These quarterly reports provided assurance that risks are identified, mitigated and managed to acceptable levels. In addition, staff were trained on Risk Management in an effort to ensure integration of risk management The Authority has continued to implement the institutional flisk, Management Policy Framework (IRMPF) in line with the Treasury Circular 3/2009 and Mwongozo Code of Conduct. The Board oversees risk management within the Authority and ensures that adequate, effective and appropriate risk management strategies and policies are in place. The Audit and Risk Committee assessed processes within the Authority

### Internal Controls

The Authority has put in place a system of internal control that is geared towards ensuring that its activities conform to its mandate. The Board has delegated the responsibility for the establishment of a framework of internal control and ethical standards to the

Policies and procedures have been put in place by Management which are designed to safeguard the assets of the authority, and to ensure the integrity of financial and non-financial reporting.

During the year, the Authority continued to monitor the internal control system and review of operations by undertaking internal audits with the objective of assessing the effectiveness of these

## UNIVERSAL ACCESS AND SERVICE

The Authority is mandated to facilitate universal access to ICT services. This is in reognition of the fact that there are certain areas in the country still underserved and unserved. In fulfillment of the above, the Universal Service Fund (USF) was established with the objective of supporting wide specad access to ICTs including related capacity building and technological innovations. The Authority hinged USF activities in Pillar 3 on Infrastructure and Service Development of its Strategic Plan (2013 - 18) to realize its vision to facilitate access and use of information and communication services by all in Kenya by 2018.

During the year, the Authority embarked on the implementation of two inaugural projects under the Universal Service Fund (USF). These were: Voice Infrastructure and Services; and Education band Connectivity.

## Voice Infrastructure and Services Project

The Authority contracted two service providers to roll out voice infrastructure in 78 sub-locations. During the year under review, voice infrastructure sites in 30 sub-locations were completed and are on air. This has improved communication services in those areas that were previously under-served and un-served

connectivity project is expected to deliver a minimum of 5 Mbps downlink and Mbps uplink speeds. Three service providers were contracted to implement the project. Out of the identified 896 schools, 882 schools have been connected to wireless connectivity project aimed at enhancing ICT connectivity in public secondary schools. The education broadband Education Broadband Connectivity Project
The Authority continued to implement the edu

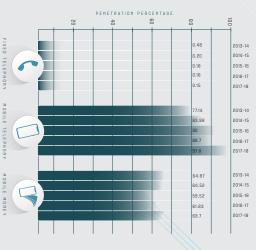

### RESEARCH AND DEVELOPMENT

POSTAL SERVICE

Research and Development (R&D) is critical to the Authority's success, sustainability and its overall organizational health. The dynamism of the ICT industry and the increased uptake of technology makes innovation a critical ingedient for effective regulation. In recognition of this, the Authority established an innovation, Research & Development (IRD) Division to adequately address these energent as well as future consumer and regulatory issues in the sector.

World PAGE 31

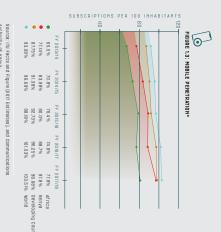

The number of mobile cellular telephone subscriptions, globally is estimated to have increased from 7.5 billion in 2016, to 7.7 billion necorded in 2017, translating to a penetration rate of 103.5 per cent as illustrated in Figure 1.1. The Commonwealth of Independent States (CIS) recorded the highest penetration rate of 14.11 per cent, albeit being slightly lower than 14.2 recorded in 2016. While all the other regions recorded penetration rates above 100 per cent, Africa registered the lowest mobile penetration rate of 77.8 per cent. Cumulatively, mobile cellular subscriptions in developing countries were estimated to be four times more than subscriptions in developing countries, were stimated to be four times more than subscriptions in developed countries, to stand at 79.2 per cent and 20.8 per cent respectively. This is as shown in Figure 1.2.

Kenya's level of mobile penetration continued to be above the African average. However, it remains below the global and developing world performance levels. Mobile telephony subscriptions in Kenya were recorded as 456 million representing a penetration rate of 97.8 per cent. This is as illustrated in Figure 13.

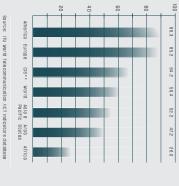

cent. This is as illustrated in Figure 1.3.

The number of active broadband subscriptions in the world increased from 3.9 billion in 2016 to 4.2 billion in 2017, representing a penetration rate of 56.4 percent up from 52.2 per cent recorded in 2016. The Americas recorded the highest broadband penetration rate of 86.3 per cent, closely followed by Europe at 85.2 per cent. The Commonwealth of Independent States (CIS), Asia & Pacific, Arab States and Africa recorded 64.2 per cent, 52.2 per cent, 47.2 per cent and 26.0 per cent respectively, which was slightly above their 2016 penetration rates. The global fixed broadband penetration rate grew manginally by 0.7 percentage points to stand at 131 per cent in 2017, with Asia and Pacific, Arab States and Africa's rates falling below the global fixed penetration level. This is as shown in Figure 1.4.

Regions are based on the ITU BDT Regions, see: http://www.itu.int en/ITU-Disatistics/Pages/definitions/regions aspx.html restimate restimate

The International Telecommunication Union (ITU) estimated that in 2017, 53.6 per cent of households in the world had access to the Internet, with Europe having the highest number of households connected to the Internet at 84.2 per cent. On the other hand, Africa was estimated to have the least number of households connected to the Internet, at 18.0 per cent.

Globally, the number of estimated Internet users grew from 3.4 billion in 2016 to stand at 3.6 billion users in 2017 as shown in figure 1.5. Subsequently, the global penetration rate grew from 4.5 per cent to 48.0 per cent in 2017. Europe continued to register the highest Internet penetration rate in comparison to other regions, to post a rate of 79.6 per cent, while Africa recorded the lowest Internet penetration of 21.8 per cent.

## 1.3 Local Environment

According to the Economic Outlook 2018, Kenya's GDP is estimated to have expanded by 4.9 per cent in 2017 compared to 5.9 per cent growth rate recorded in 2016. The uncertainties surrounding the long electioneering period as well as adverse weather conditions experienced in 2017, were the primary causes of the decelerated economic growth rate. Despite these challenges, the macroeconomic environment remained stable for the better part of 2017, with the information and communication sector growing from 9.7 per cent in 2016 to 12.7 percent in 2017. Conversely, transport and storage, manufacturing, finance and insurance and construction sectors experienced slow growth in 2017.

# MANAGEMENT C

П

# 2.1 Frequency Spectrum Management

Radio Frequency Spectrum is a scarce national resource that is held in trust and managed by the Authority on behalf of the people of Kenya. The availability and prudent management of spectrum is a major determent of digital communications development in any country. To this end, the Authority manages the Frequency Spectrum to ensure efficient utilization of the resource towards creating a conducive environment for the development of ICT services and uptake of emerging technologies in the country. Spectrum management involves planning, allocation, assignment, issuance of licenses, monitoring, surveillance and coordination of the usage of the radio frequency spectrum.

## 2.1.1 Mobile Cellular Services

During the year the Authority assigned additional frequencies in the 800MHz band to Airtel Networks Kenya Ltd. In addition, the validity period for 4G intellicense earlier issued to Telkom Kenya Ltd on the same band was extended. The Authority also extended Jamii Telecom's 4G trial license in the 700 MHz band.

over the period and hence impacting positively on over the period and hence impacting positively on the quality of 4G services offered in the country. There was also an increase in deployment of 2G transceivers despite the anticipated decline in uptake of 2G technology. 3G transceivers increased marginally showing a stable growth in data services. The deployment of 2G, 3G and 4G transceivers in the country are as shown in Table 2.1 and Figure 2.1.

### 2.1.2 Fixed Links

Fixed links are used as backhaul links for mobile network services. They provide secure point-to-point communication between two sites. Higher frequencies are assigned to these communication channels due to their capacity and directivity. The Authority assigns frequencies above SCHz fordeployment of Fixed Links. For the first time, the Authority assigned three Fixed Links in the millimeter band of 80GHz, which indicates interest in deployment of services in this band.

The cumulative number of Fixed Links assigned as at the end of the year stood at 7473, which was a decline from the previous year's 8423. The decline in the number of Fixed Links is attributed to the high uptake of Fiber Links as backhaul to the main mobile networks. Table 2.2 and Figure 2.2 show the status of fixed links in the country.

## 3.2 Provision of Services

ANNUAL REPORT

# 3.2.1 Mobile Telephony Services The total number of mobile telephony subscribers grew by 13.2 per cent in the FY 2017/18 in comparison to a 1.2 per cent growth during in the previous period. Prepaid mobile telephony subscriptions continue to be preferred to postpaid subscriptions, owing to the perceived flexibility in usage and access to a variety of tariff offerings. Subsequently, prepaid subscriptions accounted for 9/39 per cent of the total subscriptions.

Whilst Safaricom had the highest number of subscribers, its total market share by subscriptions reduced from 72.6 per cent recorded in the previous year to 63.4 per cent. This is attributed to the increase in Airtel and Tellom's market shares by subscription of 6.0 per cent and 1.6 per cent respectively. The number of subscribers is summarized in table 3.5 while figure 3.1 shows the mobile network services market share per service provider.

station. This is represented in Figure 3.5. Community FTA Radio stations on air. In addition, there were 66 Commercial FTA TV stations and one Community FTA TV There were 131 Commercial FTA Radio stations and 38

broadcasting services.

The Digital Terrestrial Television (DTT) population coverage

## 3.2.9 Tariffs and Competition

The Authority monitors tariffs and promotions offered by licensees and their overall impact on the level of competition in the ICT sector.

# 3.2.9.1 Fixed and Mobile Network Services

At the retail level, the Authority approved the launch of an additional 31 retail tariffs, as well as the variation of existing tariffs. Despite the introduction of new bundled tariff plans at different price points, the Pay-as-You-Go (PAYG) rates have remained stable since the implementation of the last phase of the glide-path set out in Interconnection Determination No. 2 of 2010 on termination rates. Table 316 illustrates the average PAYG retail tariffs for fixed and mobile communication services in the FY 2017/18.

At the wholesale level, the Authority continued to enforce implementation of inter-operator tariffs for voice and SMS services (Interconnection Determination No. 2 of 2010). In addition, implementation of regional tariff 13ps prescribed under the Northern Corridor Integration Projects' "One Network Area" (ONA) framework has led to reduction of calling rates within the region.

# 3.2.9.2 Promotions and Special Offers by MNOs

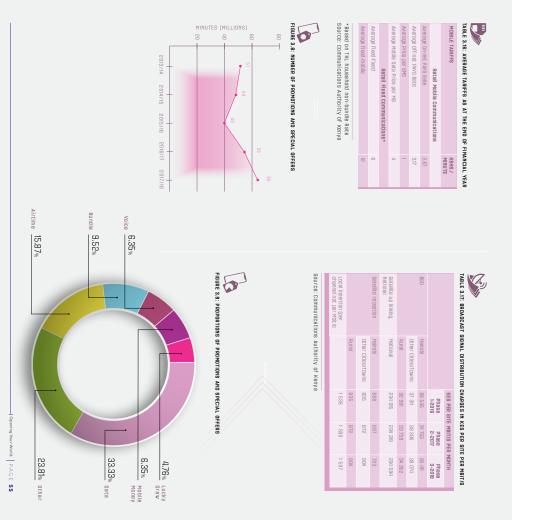

The Authority approved the launch of a total of 63 promotions and special offers. This was a 14.55 per cent increase compared to the previous period. Figure 3.8 illustrates promotion and special offers trends.

Figure 3.9 illustrates the proportions of promotions and special offers.

## 3.2.9.3 Broadcasting Services

The Authority implemented phase 2 of the broadcast signal distribution tariffs glide-path, as shown in Table 3.17 Further, the Authority continues to monitor the implementation of the determination No. 2 of 2016 on terrestrial broadcast signal charges, which prescribes price caps on BSD charges.

# 4.1.7 Evaluation of Environmental Impact

Assessment (EIA) Reports
The Authority continued its collaboration with National Environmental Management Authority (NEMA) on ICT related environmental matters. In this regard, the Authority provided technical advice on eight EIA reports as requested by NEMA.

4.1.8 Enforcement Activities

During the year, the Authority confiscated 28 GSM radio repeaters from residential and commercial premises in the course of resolving interference in the GSM band. The Authority also aided law enforcement activities by providing necessary recordings from the broadcast logger.

During the year, 15 cases that were in breach of the relevant statutory provisions were prosecuted as shown in the Figure 4.4.

## MANAGEMENT OF CYBER SECURITY

Cybersecurity is the collection of tools; policies; security concepts; security safeguards; guidelines; risk management approaches; actions; training; best practices; assurance and technologies that can be used to protect the global and national cyber environment, as well as organization and user assets. Cyber-crime on the other hand refers to criminal activity that is conducted via the internet and computers. This includes; online impersonation, propagation of false news online, mobile money fraud, creation and distribution of malware across networks, posting of obscene content online, and disruption of a country's national critical infrastructure, amongst other activities.

In order to mitigate the negative effects of cyber-crime activities in Kenya, and in line with Kenya's ICT Sector Policy, the Kenya Information and Communications Act of 1998 and the National Cybersecurity Strategy, the Covernment of Kenya, though the Authority, established the Kenya Computer Incident Response Team – Coordination Centre (National KE-CIRT/CC) as the Kenya's trusted point of contact on cybersecurity matters. This is also in line with Pillar 10f the Authority's Strategic Plana 2013-18, which is on enabling environment and Pillar 3 on infrastructure and service development.

The National KE-CIRT/CC is a multi-agency function of the government and domiciled at the Communications Authority of Kenya. It is served by technical staff both from the Communications Authority and law enforcement agencies. This multi-agency approach is aimed at expediting the response to and resolution of cyber-criminal activity where the roles, strengths and synergies of the various government agencies leads to enhanced efficiencies and effectiveness.

The functions of the National KE-CIRT/CC) are summarized in Figure 5.1.

Further, the Computer Misuse and Cybercrimes Act of 2018 was enacted in May 2018. This Act aims to provide for offences relating to computer systems; to enable timely and effective detection, prohibition, prevention, response, investigation and prosecution of computer and cyber crimes; to facilitate international cooperation dealing with computer and cybercrime matters; and for connected services.

The Authority also identified and documented data assets and strategies for capturing, storing and sharing policy, which provides guidance in identifying its knowledge review, the Authority developed a Knowledge Management and international competitiveness. During the year under Knowledge plays a central role in wealth creation, social welfare needs and data gaps, and built staff capacity through trainings

### 7.2 **Working Environment**

The Authority provides a conducive working environment to ensure a healthy, efficient and highly productive workforce.

# 7.2.1 Occupational Health and Safety

sensitization/training on emergency preparedness. physical access control system; fire drills; HSE audits; and staff enhancing facilities at the gymnasium, installation of a modern policy, various initiatives to ensure a healthy, safe and conducive In line with the Authority's Health, Safety and Environment (HSE) working environment were undertaken. These initiatives involved

**7.2.2 Environmental Sustainability**The Authority developed an Environmental Sustainability policy in an effort to promote sustainable use of ICTs, in line with the type approving ICT equipment and facilities. The Authority also participated in the 2018 World Environment Day and sensitized compliance with environmental management found CA to be the public on e-waste management. Environmental sustainability initiatives; and ecological enhancement. The Authority complied solid waste management; Climate Change adaptation mitigation towards promotion of Green ICTs. This involved: pollution control; collaborated with NEMA, EACO and other relevant partners audit carried out by NEMA to assess the Authority's level of with the Environmental Impact Assessment Regulations by best environmental practices and EMCA 1999. The Authority

# 7.2.3 Gender and Disability Mainstreaming

The Authority continued to implement its disability mainstreaming policy and implemented recommendations of the disability accessibility audit geared towards making the authority more accessibile to PWDs. The recommendations included creation of a rampat the gate entrance and lowering of the soap dispensers and doorlinobs at the PWD washooms. The Authority also renewed the license for the Job Access With Speech (JAWS) screen reading system for the visually impaired. In addition, the PWDs physical accessibility facilities continued to be maintained and Staff sensitized on disability etiquette. In its endeavor to mainstreaming and ensure gender parity in the workplace, the Gender and Disability Committee was trained and staff sensitized on gender mainstreaming.

During the year under review, the Authority commemorated the Global Celebral Palsy Awareness Month in March 2018 by participating in a documentary that was aired in the media.

# 7.2.4 Campaign Against Hiv/Aids` and Prevention Of Drugs & Substance Abuse

The Authority continued to support the Government's strategies in the fight against HIV/AIDS under the Maisha 2 Framework from National AIDS Control Council(NACC). In this regard, the Authority, conducted HIV/AIDS behavior change seminar for staff which included an on-site Voluntary Counseling & Testing (VCT) services; sensitized staff on prevention of drugs and substance abuse; distributed information Education Communication (IEC) materials to the public; held two outreach programmes focusing on HIV testing, nutrition and wellness checks in partnership with Ministry of Health (MoH) during its ICT county forums.

### 7.2.5 Culture Change

Employees were trained on culture change as part of the transition towards implementation of the Enterprise Resource Planning (ERP) system that is expected to enhance productivity. To further enhance synergy and cohesion, the Authority held team building for its employees and Board.

World PAGE 75

**National Cohesion and National Values** 

ANNUAL REPORT

In order to promote cohesion, national values and principles of governance, as stipulated in the Constitution of Kenya (2010), the Authority undertook the following activities among others: delebrated patriotic days on quarterly basis; implemented the social media monitoring system; strengthened inter and intra government relations through the regional offices; participated in the interagency committee of NCIC; and developed a collaborative framework on prevention of hate speech.

# Automation of the Authority's Processes

The Authority, in its Strategic Plan 2013-2018, committed to building its institutional capacity by modernizing internal systems and processes with a view to ensuring accountability, performance improvement, efficient service delivery and compliance with statutory requirements. In so doing, the Authority embarked on a Business Process Re-engineering Programme (BPRA) that sought to re-engineer and automation of processes at the Authority. The Programme is geared towards geared towards achieving improving service quality through customer centric processes. During the year, the Authority under the BPRA Programme, started the implementation of an Enterprise Resource Planning (ERP) system to automate processes in three functions namely; Human Capital and Administration; Procurement; and Finance and Accounts; In addition, the Authority installed videoconference and Tele-Conference facilities at its headquarters and regional offices to facilitate online meetings.

# CORPORATE COMMUNICATION AND INTERNATIONAL LIAISON

The Authority is the designated government representative to regional and international ICT intergovernmental bodies. In fulfilment of this obligation, the Authority engaged various stakeholders on industry matters, participated in various local, regional and international fora, carried out public awareness campaigns and undertook a number of Corporate Social Responsibility (CSR) initiatives.

# 8.1 Engaging Stakeholders and Local Communities

During the year under review, the Authority continued to engage stakeholders in the ICT sector as well as local communities on various activities, in order to ensure that the Authority consistently maintains good relationships with stakeholders, a stakeholder engagement framework was developed as a guiding blueprint.

CA Director General Mr. Francis Wangusi cuts a ribbon to unveil two classrooms construct by the Authority at Meguarra Primary School in Kajiado County.

# 8.1.1 Corporate Social Responsibility

to contributing to the sociol-economic well-being to society through its Corporate Social Responsibility and Sponsorship programmes.

Some of the activities carried out in the year under the CSR banner include the provision of equipment in a computer laboratory at Endarasha Boys High School rehabilitation of the school facilities at Friends Boys High School Namwela and construction of two classrooms at Meguarra Primary School.

To support the less fortunate in the society, the Authority donated footstuff and other basic necessities to Turnshangilleni Mtoto wa Afrika in Nairobi; Little Rock Children's home in Nairobi; Kimbilio Hospice in Uasin Gishu; and Waa Children's Home in Mombasa County in addition, the Authority supported the Mater Heart Run, an initiative geared at assisting children with heart allments. Further, the Authority continued its sponsorship of Talanta Football Club and the Sports Man of the Year Awards (SOYA) programmes.

### 8.1.1.2 Kuza Awards

During the year, the Authority held the second edition of the CA Kuza Broadcasting Awards. This is an initiative to recognize and fete broadcasters who demonstrate excellence in their broadcasts in line with regulatory requirements. The objectives of the Awards are to:

responsible and responsive broadcasting regulator, consumer participation in the broadcasting regulator process; and encourage the use of the broadcasting platform for socio-economic development. The Authority maintained the three categories of awards namely Regulatory Compilance Awards, Collaborative Awards and People's Choice Award.

# 8.1.2 Public and Stakeholder Consultations

is the regulator of the ICT Sector, the Authority is expected on involve stakeholders on any policy issues from time of time. The input from stakeholders is key in ensurin hat decisions taken by the Authority not only reflect the alities of the industry but are also responsive to the media of stakeholders and the public. The stakeholder needs of stakeholders and the public, The stakeholder angagements include meetings, forums, workshops an infine correspondences.
