

Privacy and Data Bill 2018

Disposal of Private Data and Records Clause

In addition to other contributions towards the bill, there is another major area that will need to be protected.

Different entity can have the Data and protect the privacy, but disposal of this data is critical especially when the entity is done with the collected data and requires to be disposed securely. Reasonable measures to prevent and protect these records from being accessed by unauthorized predators must be implemented.

Entities will require to implement and comply with procedures and policies that includes on site shredding, off site shredding, pulverizing and burning of records.

These measures will prevent information and data from being recreated and making it easy to read. Above measures will prevent this bleed.

Recommendations

1. Entities will be mandated to come up with policies and procedure that will either include; shredding, pulverizing and burning records as their policy of disposing data and records.
2. Strick fine need to be set for breaching the trust entrusted to the entity by allowing predators who use this data for impending on Kenyans privacy.
3. Categorization of different shredding sizes and types of cuts depending on the sensitivity of the records.
